## DETAILED ACTION

### *Claim Objections*

1. Claims 7 and 12 objected to because of the following informalities: In claim 7, last line “ stages” should read—stage—
2. In claim 12, the dependency should be from – claim 11—. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7,8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by 10-0278551 Korea of record.

The reference shows a multiple stage LC oscillator(see figures 8,9, and 10) comprising a plurality of LC oscillator stages that are coupled to preceding and succeeding stages(see figure 10). Each stage having more than two inputs and two outputs going to a plurality of adjacent stages. Note that one stage in figure 9 has more than two outputs for coupling to adjacent stages. The first stage in figure 10, leftmost stage receives a feedback from the second stage output(the middle stage).

*Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 7 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,724,267. Although the conflicting claims are not identical, they are not patentably distinct from each other because The claim in the current application is merely a broader presentation now being claimed for the multiple stage ring oscillator with first, second and third stages and corresponding input/output connections.

*Allowable Subject Matter*

5. Claim 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 13 is allowed.
